## Key Instant Recall Facts

## Year 5 - Summer 1

## I can recall square numbers up to $12^{2}$ and their square roots.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts instantly.

$$
\begin{array}{rrr}
1^{2}=1 \times 1=1 & \sqrt{1}=1 \\
2^{2}=2 \times 2=4 & \sqrt{4}=2 \\
3^{2}=3 \times 3=9 & \sqrt{9}=3 \\
4^{2}=4 \times 4=16 & \sqrt{16}=4 \\
5^{2}=5 \times 5=25 & \sqrt{25}=5 \\
6^{2}=6 \times 6=36 & \sqrt{36}=6 \\
7^{2}=7 \times 7=49 & \sqrt{49}=7 \\
8^{2}=8 \times 8=64 & \sqrt{64}=8 \\
9^{2}=9 \times 9=81 & \sqrt{81}=9 \\
10^{2}=10 \times 10=100 & \sqrt{100}=1 \\
11^{2}=11 \times 11=121 & \sqrt{121}=1 \\
12^{2}=12 \times 12=144 &
\end{array}
$$

| Key Vocabulary |
| :--- |
| What is 8 squared? |
| What is 7 multiplied by itself? |
| What is the square root of 144 ? |
| Is 81 a square number? |

Children should also be able to recognise whether a number below 150 is a square number or not.

## Top Tips

The secret to success is practising little and often. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day. If you would like more ideas, please speak to your child's teacher.

Cycling Squares - At http://nrich.maths.org/1151 there is a challenge involving square numbers. Can you complete the challenge and then create your own examples?

Use memory tricks - For those hard-to-remember facts, www.multiplication.com has some strange picture stories to help children remember.
